WE UNDERSTAND YOUR NEEDS

Feeding ingredients into your food process can be challenging. Often ingredients are fragile or require precise control, for example:

- traceability,
- sanitary requirements,
- accurate and reliable feeding,
- strict recipe compliance.

Our specialized sanitary equipment is optimized to safely and reliably process challenging dry, wet and liquid ingredients.
RAISINS ARE NOT THE ONLY INGREDIENTS WITH SPECIFIC REQUIREMENTS.

Raw ingredients are very different in size and shape, each having its own characteristics. When combined, these characteristics can often change. For example, combining sticky fruits with nuts produces a chewy granola bar. Our fruit feeder is designed to ensure that nuts do not get crushed and raisins do not stick. This is a great example of optimizing equipment to the ingredient.
Hygienic Design is our standard

Hygienic Design at Brabender Technologie includes:

- Smooth stainless-steel surfaces
- No exposed threads in product contact areas
- Ease of cleaning
- Minimization of horizontal surfaces
- FDA and 1935/2004-compliant materials

HYGIENIC BY DESIGN

Our equipment is designed to meet the stringent hygienic standards of the food industry. Brabender Technologie is a member of the European Hygienic Engineering & Design Group (EHEDG) and we also follow FDA guidelines in the manufacture and design of our sanitary product line.
Our Food EQUIPMENT PORTFOLIO

AT A GLANCE

We offer a broad portfolio of gravimetric and volumetric feeders and discharging equipment for food applications.

- FlexWall® Plus
- FlexWall® Classic
- Single Screw Feeder (DSR)
- Twin Screw Feeder (DDSR)
- Vibrating Tray Feeder
- Weight-Belt Feeder
- Liquid Feeder (FDDW)
- Discharging aids

CUSTOM COMPONENTS FOR SPECIFIC TASKS

Drawing on decades' worth of expertise as a manufacturer of feeders and in collaboration with our customers, we create solutions for your specific requirements. We are your trusted partner for:

- regulation compliance and
- integration into new and existing production facilities.
ONE OPERATOR INTERFACE FOR UPTO 16 FEEDERS

Be they single or multiple feeder control systems, feeder mounted or control panel installed: our smart systems enable, if required, up to 16 feeders in one production line to be controlled, and they communicate directly with most host/PLC systems.

CONTROLS
Our state-of-the-art control systems feature intelligent software and flexible interfaces which are both essential for precise feeding solutions.

OPERATOR INTERFACES
Our user friendly touch screen interfaces feature intuitive menu structures that focus on essential parameters.

REMOTE SERVICE OPTIONS
Our service technicians can provide 24/7 remote-maintenance support through a range of options such as TeamViewer, phone, and internet to help with diagnostics and troubleshooting.
Worldwide Service
